

Water Filter Clean (EVERY Turn)

Step 1: Spin Down Clean Filter

1. Turn the **BLUE valve OFF** (to the **LEFT** of filter) - handle pointing up.
2. Do a **Spin Down Clean**: Run auto flush sequence one time:
 - a. Press the physical button.
 - b. Press the white LED button.
 - c. Water will spin around the filter into drain line

Step 2: Backwash the Filter

1. Use filter wrench to **turn the filter valve to "Backwash."**
2. **Run the auto flush** sequence **until** the filter is **clean**:
 - a. Press the physical button.
 - b. Press the white LED button.
 - c. Water flows **backward** through filter into drain line

why we do this?

This flushes sediment into the drain. Keep flushing until the screen is clear.

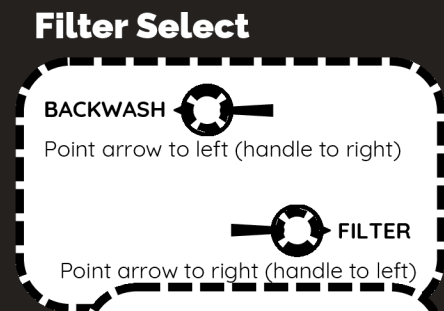

Step 3: Reset to Filter

1. Turn the **filter valve to "Filter."** (use filter wrench)
2. Turn the **BLUE valve ON** (to the **LEFT** of filter) - handle pointing left.
3. Double Check:
 - a. Filter valve - **small arrow pointing to "Filter"**
 - b. **Green Valve turned to "on"** (if it was turned off)
 - c. **Clock Display settings are correct**

why we do this?

Resets water flow so it runs through the filter the right way for the next guests.

Clock Display Settings

1. Time set to "01"
2. D - visible on display
3. Time icon visible below "D"
